HIV COUNSELING & TESTING REPORTS
These are federal forms from the federal Centers for Disease Control and Prevention. This record is used in this 100% federally funded section for computer data entry and various computer reports can be generated for the State Department of Health and the testing and/or counseling center staff. Extensive demographic data is available but not personally identifiable information is present. File may also include an HIV Anonymous Consent Form.

DESTROY the paper reporting form after verification of data entry. TRANSFER demographic computer reports to the INDIANA ARCHIVES for EVALUATION, SAMPLING or WEEDING pursuant to archival principles five (5) years after the year of the report.

CONFIDENTIAL POSITIVE CASE REPORTS
These are predominantly paper files that may contain several State Forms and/or federal forms, including Notification of Release of HIV/AIDS Offenders (SF 44993), Confidential Report of Communicable Diseases (SF 43823), various laboratory reports, risk investigations, correspondence and miscellaneous notes. Data is also entered into e-HARS, the HIV reporting system of the Federal Centers for Disease Control (CDC). Disclosure of these records may be subject to 42 USC 242m(d) and IC 16-41-8-1.

IMAGE according to IARA imaging standards and MICROFILM according to 60 IAC 2 after data entry into the CDC’s HIV reporting system. TRANSFER original negative roll and one (1) copy of electronic images to the INDIANA ARCHIVES for EVALUATION, SAMPLING and WEEDING pursuant to archival principles after verification for completeness and legibility. TRANSFER duplicate microfilm roll to agency. DESTROY hard copies after verification of INDIANA ARCHIVES transfer, and DESTROY agency microfilm upon receipt of written permission from the CDC.

NEG, NON-ID HIV ANTIBODY LAB REQUISITION
This requisition from a confidential testing site is submitted to the State Department of Health’s Bureau of Laboratories. The medical specimen is analyzed and the negative result reported. Non-identifiable requisitions and reports cannot be traced to any individual. Since the person tested is not identified, and the report is negative, the report is of no value to the HIV/STD Division.

DESTROY after receipt of the report.

POSITIVE, NON-ID HIV ANTIBODY LAB REQUISITION, NO SF NUMBER SHOWN
Although a positive test result occurs, the person tested is not identified. No connection to the person can be made, therefore, the records are not placed into any case file and none is created.

DESTROY after receipt of the report.

POSITIVE, NON-IDENT HIV LAB REPORT
This computer-generated form is identical to the Record Series 92-90 with the exception of the test result. Since no personally identifiable data is listed, the test result cannot be placed into a case file and none is created.

DESTROY after receipt of the report.

CONFIDENTIAL NEGATIVE CASE REPORTS
These are predominantly paper files that may contain several State or federal forms. These may include a negative HIV Serological Laboratory Report and/or an HIV Antibody Requisition. Typical files may contain correspondence, authorizations for release of information, and miscellaneous notes.

TRANSFER to the RECORDS CENTER two (2) years after the end of the fiscal year in which report was received. DESTROY after an additional eight (8) years in the RECORDS CENTER.

RECALCITRANT CONFIDENTIAL CASE FILES
These are predominantly paper files that may contain several State Forms and/or federal forms, including Notification of Release of HIV/AIDS Offenders (SF 44993), various laboratory reports, legal documents, correspondence and miscellaneous notes. Disclosure of these records may be subject to 42 USC 242m(d) and IC 16-41-8-1. Retention consistent with IC 34-13-1-1.

TRANSFER to the RECORDS CENTER two (2) years after the end of the fiscal year in which report was received. TRANSFER to the INDIANA ARCHIVES for EVALUATION, SAMPLING or WEEDING pursuant to archival principles after an additional eight (8) years in the RECORDS CENTER.
